General Discussion

Implications of recommendations and schedule on the development of the health workforce section of the plan and workforce models for testing grant proposal

Summary of input to date into development of workforce section: Ron Preston

Consideration of potential topics of emphasis, such as

- Meeting demand for primary care clinicians
- Health disparities
- Population health
- Community-based training
- Team training and team approaches to care
- Allied Health Professionals
- Career ladders
- Synergies among UConn's schools and between UConn and Community Colleges
- Modern training methods: simulation, informatics, E-learning, online courses, open courses
- Training for existing workforce in skills needed for modern care delivery
- Retraining for clinicians who wish to change specialties
- Issues pertinent to clinical specialists

Teamwork between DPH & UConn in developing the health workforce section, and an a plan for completing the task
